

Great geysers gush grandly in geothermal geogra-
phies. Glimmering geysers, gigantic geysers, garru-
lous geysers, giddy geysers! Green grass grows around
great geysers, gleaming glaciers glitter in the distance.
Giggling geese gather to glimpse the glorious geysers.
Gushing geysers give great gifts of geothermal energy,
generating great growth and giving geologists a glimpse
into the grand geology of the globe.
