

Great geysers gush grandly in geothermal geogra-
phies. Glimmering geysers, gigantic geysers, garru-
lous geysers, giddy geysers! Green grass grows
around great geysers, gleaming glaciers glitter in the
distance. Giggling geese gather to glimpse the glo-
rious geysers. Gushing geysers give great gifts of
geothermal energy, generating great growth and giv-

ing geologists a glimpse into the grand geology of the
globe.
